Poisoned Planet: How Constant Exposure to Man-Made Chemicals Is Putting Your Life at Risk Julian Cribb

By the author of *The Coming Famine*, this book sounds a wake up call: we cannot rely on governments or industry to clean up the toxic manmade chemicals we've surrounded ourselves with, it's up to us to repair our poisoned planet

We want things to be cheap, convenient, and useful. Our food arrives contaminated with pesticides and wastes, wrapped in plastic made of hormone-disrupting chemicals. We bathe and dress our children in petrochemicals. Even our coffee contains miniscule traces of arsenic, cup by cup adding to the toxins accumulating in our bodies. Man-made chemicals are creating a silent epidemic. Our children are sicker; cancer, obesity, allergies, and mental health issues are on the rise in adults; and, frighteningly, we may be less intelligent than previous generations. A poisoned planet is the price we pay for our lifestyle, but Julian Cribb shows we have the tools to clean it up and create a healthier, safer future for us all.
