Analysis and Geometry in Control Theory and its Applications (Springer INdAM Series)

Since the 1950s control theory has established itself as a major mathematical discipline, particularly suitable for application in a number of research fields, including advanced engineering design, economics and the medical sciences. However, since its emergence, there has been a need to rethink and extend fields such as calculus of variations, differential geometry and nonsmooth analysis, which are closely tied to research on applications. Today control theory is a rich source of basic abstract problems arising from applications, and provides an important frame of reference for investigating purely mathematical issues. In many fields of mathematics, the huge and growing scope of activity has been accompanied by fragmentation into a multitude of narrow specialties. However, outstanding advances are often the result of the quest for unifying themes and a synthesis of different approaches. Control theory and its applications are no exception. Here, the interaction between analysis and geometry has played a crucial role in the evolution of the field. This book collects some recent results, highlighting geometrical and analytical aspects and the possible connections between them. Applications provide the background, in the classical spirit of mutual interplay between abstract theory and problem-solving practice.

From reader reviews:

Robert Glass:

The experience that you get from Analysis and Geometry in Control Theory and its Applications (Springer INdAM Series) may be the more deep you rooting the information that hide in the words the more you get interested in reading it. It does not mean that this book is hard to recognise but Analysis and Geometry in Control Theory and its Applications (Springer INdAM Series) giving you joy feeling of reading. The writer conveys their point in particular way that can be understood by means of anyone who read that because the author of this e-book is well-known enough. This kind of book also makes your vocabulary increase well. So it is easy to understand then can go to you, both in printed or e-book style are available. We suggest you for having this kind of Analysis and Geometry in Control Theory and its Applications (Springer INdAM Series) instantly.

Marina Rutt:

Reading a publication can be one of a lot of action that everyone in the world loves. Do you like reading book consequently. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new data. When you read a publication you will get new information because book is one of a number of ways to share the information or maybe their idea. Second, examining a book will make a person more imaginative. When you reading a book especially fictional works book the author will bring you to imagine the story how the people do it anything. Third, you can share your knowledge to some others. When you read this Analysis and Geometry in Control Theory and its Applications (Springer INdAM Series), you could tells your family, friends as well as soon about yours guide. Your knowledge can inspire the mediocre, make them reading a publication.

Victor Shepard:

This Analysis and Geometry in Control Theory and its Applications (Springer INdAM Series) is great e-book for you because the content that is full of information for you who always deal with world and have to make decision every minute. This kind of book reveal it facts accurately using great arrange word or we can point out no rambling sentences inside. So if you are read the item hurriedly you can have whole data in it. Doesn't mean it only gives you straight forward sentences but difficult core information with lovely delivering sentences. Having Analysis and Geometry in Control Theory and its Applications (Springer INdAM Series) in your hand like finding the world in your arm, details in it is not ridiculous one particular. We can say that no guide that offer you world inside ten or fifteen small right but this book already do that. So , this is certainly good reading book. Heya Mr. and Mrs. occupied do you still doubt this?

Susan Preuss:

As a pupil exactly feel bored to help reading. If their teacher questioned them to go to the library or to make summary for some guide, they are complained. Just small students that has reading's soul or real their

interest. They just do what the trainer want, like asked to go to the library. They go to presently there but nothing reading really. Any students feel that examining is not important, boring as well as can't see colorful pics on there. Yeah, it is to get complicated. Book is very important in your case. As we know that on this era, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore , this Analysis and Geometry in Control Theory and its Applications (Springer INdAM Series) can make you truly feel more interested to read.
