Beyond the Cosmos: What Recent Discoveries in Astrophysics Reveal about the Glory and Love of God Hugh Ross

New and updated Third Edition from Hugh Ross. Since the publication of "Beyond the Cosmos" first and second editions, scientists have made even more discoveries substantially strengthening the evidence for general relativity (hence for a transcendent Creator) and for string theory (hence for a ten-dimensional cosmos). This new edition builds on the new data and adds more evidence for the biblical account of origins.

How can it be?

- How can my choices be totally "free" if God is in control of all things at all times and knows the end from the beginning?
- How can God hear my words and thoughts while listening to billions of others around the world at exactly the same moment?
- How can God be all-powerful and all-loving and yet allow so much suffering and evil?

These are complex paradoxes with far-reaching implications that have troubled people for centuries, testing the faith of those who believe in the biblical, personal God, and proving a stumbling block to those who do not.

But phenomena that seem impossible in the four-dimensional world we know (the three dimensions of space, plus the dimension of time) can become comprehensible when examined in the context of extra dimensions. Recent scientific discoveries have established that the equivalent of at least eleven dimensions exist. What are the implications of a personal God who can operate in and beyond such a realm?

The Bible is unique among the sacred writings of the world's great religions, describing God as existing beyond the reaches of time and space as we know them. In this groundbreaking book, Dr. Hugh Ross examines scientific evidence that confirms the Bible's declaration about God's role in creation and may help explain some of the great paradoxes of the Christian faith.

Drawing on substantial evidence, Dr. Ross invites us to know and experience God in a way we have never done before. As a result, our love and appreciation of Him will be dramatically deepened, and the way we relate to Him and to others-both believers and nonbelievers-will be changed forever.

"Hugh Ross always offers stimulating perspective on both God and science. And this book will certainly encourage you to think-whether you're a Christ-follower, a spiritual seeker, or even a skeptic."

- Bill Hybels, senior pastor, Willow Creek Community Church

"Dr. Ross has shown that the tools scientists have used to deal with paradoxes in the physical world can also be applied to gain important insight into various paradoxes in Scripture. Difficulties that have plagued the Christian community for centuries are not only clarified when 'seen' from the point of view of one living in a higher dimension, but those same difficulties also become the basis for strong proof of the supernatural inspiration of the Bible. This book will provide food for thought for any student of the Word and will, no doubt, begin a new area of biblical research to which others can contribute."

-David Rogstad, Ph.D., physicist, Caltech Jet Propulsion Laboratory

About the Author

HUGH ROSS earned his B.S. in physics from the University of British Columbia and his M.S. and Ph.D. in astronomy from the University of Toronto. He is the founder of Reasons to Believe, and hosts a television series by the same name which is broadcast internationally on TBN. He is a highly requested speaker on the topics of faith and science.

From reader reviews:

Kevin Buckley:

Now a day individuals who Living in the era exactly where everything reachable by talk with the internet and the resources in it can be true or not demand people to be aware of each information they get. How individuals to be smart in having any information nowadays? Of course the answer is reading a book. Studying a book can help persons out of this uncertainty Information particularly this Beyond the Cosmos: What Recent Discoveries in Astrophysics Reveal about the Glory and Love of God book because book offers you rich data and knowledge. Of course the details in this book hundred % guarantees there is no doubt in it as you know.

Lucinda Smith:

Reading a reserve can be one of a lot of pastime that everyone in the world likes. Do you like reading book therefore. There are a lot of reasons why people love it. First reading a e-book will give you a lot of new data. When you read a book you will get new information due to the fact book is one of numerous ways to share the information or perhaps their idea. Second, examining a book will make you actually more imaginative. When you studying a book especially fictional works book the author will bring you to imagine the story how the people do it anything. Third, it is possible to share your knowledge to others. When you read this Beyond the Cosmos: What Recent Discoveries in Astrophysics Reveal about the Glory and Love of God, it is possible to tells your family, friends and soon about yours publication. Your knowledge can inspire others, make them reading a book.

Craig Baker:

You could spend your free time to learn this book this reserve. This Beyond the Cosmos: What Recent Discoveries in Astrophysics Reveal about the Glory and Love of God is simple to bring you can read it in the park, in the beach, train as well as soon. If you did not include much space to bring the actual printed book, you can buy often the e-book. It is make you much easier to read it. You can save often the book in your smart phone. Consequently there are a lot of benefits that you will get when one buys this book.

Joseph Alderete:

This Beyond the Cosmos: What Recent Discoveries in Astrophysics Reveal about the Glory and Love of God is brand-new way for you who has intense curiosity to look for some information given it relief your hunger of knowledge. Getting deeper you in it getting knowledge more you know otherwise you who still having bit of digest in reading this Beyond the Cosmos: What Recent Discoveries in Astrophysics Reveal about the Glory and Love of God can be the light food in your case because the information inside that book is easy to get by simply anyone. These books produce itself in the form and that is reachable by anyone, yep I mean in the e-book contact form. People who think that in publication form make them feel sleepy even dizzy this publication is the answer. So you cannot find any in reading a e-book especially this one. You can

find what you are looking for. It should be here for anyone. So , don't miss the item! Just read this e-book type for your better life as well as knowledge.
