The issues discussed include whether there are several different types of intelligence, whether intelligence differences are caused by genes or the environment, the biological basis of intelligence differences, and whether intelligence declines or increases as we grow older. "Cosmology: A Very Short Introduction" by Peter Coles (0-19-285416-X/978-0-19-285416-2): "There is an embarrassment of books about the universe for the general reader, but few manage to pack so much, so elegantly, into such a compact space as this does. The book is generously illustrated." - "The Guardian". "Quantum Theory: A Very Short Introduction" by John Polkinghorne (0-19-280252-6/978-0-19-280252-1): This book gives a lucid, exciting, and accessible account of the surprising and counterintuitive ideas that shape our understanding of the sub-atomic world. The main text makes no use of equations, but there is a Mathematical Appendix for those desiring stronger fare.
