Basic Vehicle Motion Analysis: A Modern Accident Reconstruction Guide with EZ-Recon on CD-ROM David N. Dresser

This text details the 180 most common equations that accident reconstructionists use in their field. Not a reconstructionist? This book gives you the basic vocabulary that you need, as well as examples with each equation. This book is a handy reference for the reconstructionist as well.

Would you like to know how to convert the length of a skid mark into driving speed? It takes almost no time. Would you like to measure acceleration and deceleration in terms of time and distance? No problem!

Even better, we include a companion computer program. You will be able to solve relatively complex traffic accident reconstruction problems by keying in the needed information. The book shows you the equations on paper, but the software will perform the same equations in an instant!

This text and accompanying program provide the reader with the necessary tools to answer common precollision vehicle motion analysis questions, including:

- * If a vehicle is traveling at 57 miles per hour on a dry concrete roadway surface, how much distance will it cover as it brakes to a stop?
- * If a vehicle traveling at 63 miles per hour leaves 38 feet of skid marks before it collides with a pedestrian, what is its speed at impact?
- * If a vehicle moves across an intersection after stopping at a stop sign, how long will it take the vehicle to clear the intersection?

These are just a few examples of the questions that arise during basic traffic accident reconstruction. This text and the companion program make answering these questions and more as simple as using a four-function desk calculator.

CD-ROM is Windows 95/98 compatible and works best with 32MB RAM and a Pentium processor.

From reader reviews:

William Perez:

The book Basic Vehicle Motion Analysis: A Modern Accident Reconstruction Guide with EZ-Recon on CD-ROM make you feel enjoy for your spare time. You can use to make your capable much more increase. Book can to become your best friend when you getting strain or having big problem with the subject. If you can make examining a book Basic Vehicle Motion Analysis: A Modern Accident Reconstruction Guide with EZ-Recon on CD-ROM being your habit, you can get considerably more advantages, like add your own personal capable, increase your knowledge about several or all subjects. You may know everything if you like start and read a reserve Basic Vehicle Motion Analysis: A Modern Accident Reconstruction Guide with EZ-Recon on CD-ROM. Kinds of book are a lot of. It means that, science guide or encyclopedia or other people. So , how do you think about this reserve?

Cory Denton:

What do you about book? It is not important to you? Or just adding material if you want something to explain what yours problem? How about your free time? Or are you busy individual? If you don't have spare time to try and do others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? All people has many questions above. They need to answer that question since just their can do which. It said that about publication. Book is familiar in each person. Yes, it is proper. Because start from on jardín de infancia until university need that Basic Vehicle Motion Analysis: A Modern Accident Reconstruction Guide with EZ-Recon on CD-ROM to read.

Michael Trumbo:

In this 21st centuries, people become competitive in most way. By being competitive right now, people have do something to make these people survives, being in the middle of the crowded place and notice by surrounding. One thing that at times many people have underestimated that for a while is reading. That's why, by reading a book your ability to survive improve then having chance to remain than other is high. In your case who want to start reading some sort of book, we give you that Basic Vehicle Motion Analysis: A Modern Accident Reconstruction Guide with EZ-Recon on CD-ROM book as beginning and daily reading guide. Why, because this book is usually more than just a book.

Sally Norman:

Now a day people who Living in the era just where everything reachable by connect with the internet and the resources within it can be true or not require people to be aware of each information they get. How many people to be smart in receiving any information nowadays? Of course the reply is reading a book. Examining a book can help men and women out of this uncertainty Information particularly this Basic Vehicle Motion Analysis: A Modern Accident Reconstruction Guide with EZ-Recon on CD-ROM book since this book offers you rich data and knowledge. Of course the data in this book hundred per cent guarantees there is no

doubt in it everbody knows.
