## Mobile Communication and the Family (Mobile Communication in Asia: Local Insights, Global Implications)

This volume captures the domestication of mobile communication technologies by families in Asia, and its implications for family interactions and relationships. It showcases research on families across a spectrum of socio-economic profiles, from both rural and urban areas, offering insights on children, adolescents, adults, and the elderly. While mobile communication diffuses through Asia at a blistering pace, families in the region are also experiencing significant changes in light of unprecedented economic growth, globalisation, urbanisation and demographic shifts. Asia is therefore at the crossroads of technological transformation and social change. This book analyses the interactions of these two contemporaneous trends from the perspective of the family, covering a range of family types including nuclear, multi-generational, transnational, and multi-local, spanning the continuum from the media-rich to the media have-less.
