## Describing Cognitive Processes in Translation: Acts and events (Benjamins Current Topics)

This volume addresses translation as an act and an event, having as its main focus the cognitive and mental processes of the translating or interpreting individual in the act of translating, while opening up wider perspectives by including the social situation in explorations of the translation process. First published as a special issue of *Translation and Interpreting Studies* (issue 8:2, 2013), the chapters in this volume deal with various aspects of translators' and interpreters' observable and non-observable processes, thus encouraging further research at the interface of cognitive and sociological approaches in this area. In terms of those distinctions, the chapters can be characterized as studies of the actual cognitive translation acts, of other processes related to the translation acts, or of processes that are related to the sociological translation event.
